GAME DESIGN PORTFOLIO - Gameplay videos, system breakdowns & level design: ruiqiqq.github.io

Gameplay/system designer focused on turning design goals into testable prototypes. Experienced with Unreal Blueprint, Unity, gameplay systems, balance/configuration data, level iteration, and cross-discipline implementation. Portfolio includes active team production, a shipped capstone title, commercial tooling work, and independent prototypes.

EXPERIENCE

Gameplay / Systems Designer (Founding Team) | Qainbow LLC | Utah, USA | Aug 2026 - Present

- Developing Breach Brew in Unreal Engine 5, focused on environmental gameplay and reusable technical prototypes.
- Built data-driven frost materials, tunable Wind/Spark Niagara effects, a reusable power Actor Component, and a Bubble Gun prototype; exploring the simulation as a potential AI-agent training/evaluation sandbox.

Part-time Systems & Balance Designer | Time Stop Game Project Team (company registration in progress) | Shanghai, China | 2026 - Present

- Contribute to systems and numerical design for an indie game project, defining rules, configuration needs, and balance-related content with the development team.

Business Operations Intern | IMAY International (Hong Kong) Limited | Hong Kong | Jun 2024 - Sep 2024

- Researched and sourced prospective overseas clients; helped configure AI-assisted workflows for client research and information organization.
- Supported one international trade order under manager supervision, assisting with quotation, communication, schedule tracking, and delivery coordination.

SELECTED GAME PROJECTS

Combat / Systems / Level Design / VFX | Punk Plush Panic | Unity | Capstone | 2025-2026

- Improved boss attack readability by tuning release timing and driving the addition of ground telegraphs; built configurable portals, path-driven traps, and other level mechanics.
- Iterated from playtest feedback and cut lower-priority level content late in production to protect the core experience and delivery schedule; released on Steam.

Gameplay / Combat Design + Blueprint Implementation | Third-Person Soulslike Combat Prototype | Unreal Engine 5 | Personal Project | 2026

- Implemented light/heavy attacks, dodge/stamina, lock-on, hit detection, enemy reactions, projectiles, and combat tuning entirely in Blueprint.
- Used AnimNotifyState + input buffering for combo windows, reusable EnemyBase/ProjectileBase inheritance, Blueprint Interfaces, AnimBP reference caching, and animation retargeting.

Gameplay Data / Tools | The E Book | Unity | Commercial Project | 2026

- Maintained gameplay balancing/configuration spreadsheets and redesigned the designer-facing data workflow; built an AI-assisted tool that converts Excel data into Unity-ready formats.

VR Gameplay / Level / Materials | Maimed Maintenance | Unreal Engine | VR Escape Room Prototype | 2025

- Implemented selected puzzles, door logic, interaction feel, environment assembly, and glass/water materials for a playable VR escape-room prototype.

EDUCATION & SKILLS

University of Utah - B.S. in Games, 2022 - May 2026 | Graduated May 1, 2026 | GPA 3.86/4.0 | Dean's List 2022-2025

Engines/Design: Unreal Engine 5 / Blueprint, Unity, Godot; gameplay, systems, combat, level design, balancing/configuration

Technical/Workflow: Niagara, material parameters, VFX, Excel data tables, Git, Perforce, AI-assisted workflows; basic Python for scripting/tool prototypes

3D/Content: Maya, Blender (basic modeling), Photoshop, Premiere Pro

Additional: Bilibili gaming content channel (110K+ followers): content selection/localization, publishing, and community engagement. GDC 2026 booth support (temporary/volunteer).
