Education

University of Utah | B.S. in Games

Aug 2022 - Apr 2026 | Degree conferred April 30, 2026 | GPA 3.880/4.000

Coursework: Programming for All 1 / 2; Statistical Inference; Game Engine Fundamentals. Dean's List, multiple semesters.

Robotics Project

Visual Grasp Verification and Failure Recovery | Personal simulation project | Oct 2026

- Directed task design and evaluation for a robotic manipulation simulation. Assessed grasp strategies and obstacle handling, driving alternative-grasp comparisons and stacked-object validation.
- Guided iteration of an RGB-D workflow combining target localisation, programmed extraction, visual grasp verification and failure recovery. The workflow completed 7/7 development layouts, matching a relocate-first baseline.
- Evaluated a separate neural skill selector trained with PPO for 96 episodes; it achieved 10/12 completions on new development-validation layouts, matching the rule-based baseline. The demonstrated recovery uses programmed logic.

AI-assisted development: implementation, debugging and experiment automation; I directed tasks, testing and result review.

Work and Internship Experience

Qainbow LLC | Founder, Technical / Systems Designer Utah, USA | Aug 2026 - Present

- Translate design goals into implementation tasks and coordinate production. For Breach Brew, develop reusable Blueprint systems, environmental materials and Niagara feedback.

TimeStay | Part-time Systems and Balance Designer Shanghai, China | 2026 - Oct 2026

- Contributed gameplay rules, numerical configuration and balance content; communicated implementation needs with the team.

SoulLink (Daedalia) | AI Video and Social Media Intern Los Angeles, CA (Remote) | Oct 2026

- Contributed to AI-character promotional video concepts and script revisions, addressing character performance, voice consistency and editing transitions.

Horizon Style | Business Operations Intern Suzhou, China | Jun - Sep 2025

- Researched overseas prospects and organised client information. Supported one international trade order under manager supervision, assisting with quotations, communication, schedules and delivery coordination.

Selected Technical Projects

Punk Plush Panic | Unity capstone | 2025 - 2026

Improved boss telegraphs; built configurable portals and path-driven traps; iterated from playtests and reduced scope for delivery. Released on Steam.

The E Book | Unity | Commercial project

Maintained balancing spreadsheets and redesigned the data workflow; developed an AI-assisted Excel-to-Unity conversion tool.

Skills

Programming and tools: Unreal Blueprint; basic Python / JSON; Excel; Git / Perforce.

Project experience: Isaac Sim / Isaac Lab, RGB-D workflows; Unity, Godot, Niagara and materials; basic Maya / Blender.
Languages: native Chinese; fluent English.
